

## SELF-INTRODUCTION

Good morning , my name is Himavan P, and I'm currently pursuing a Bachelor of Technology in Artificial Intelligence and Data Science at Karpagam Academy of Higher Education,Coimbatore, with an CGPA of 6.5.I am a disciplined and hard-working individual with a strong desire to gain real-world experience and contribute meaningfully to the growth of any organization I join.

During my academic journey, I have had the opportunity to intern with Prime Solutions in Coimbatore and Pantech Solutions in Chennai, where I gained practical exposure to the industry. My technical skill set includes programming languages like Python and C, with hands-on experience in machine learning tools such as Scikit-learn, PyTorch, and TensorFlow.

I am also proficient with data analysis tools like SQL, NumPy, Pandas, and visualization tools including Power BI, MS Excel, and Matplotlib.

I have completed three projects, one of my key projects involved COVID-19 data analysis, where I used tools like NumPy and Power BI to clean, transform, and visualize global pandemic data. This helped sharpen my analytical thinking and data interpretation skills.

I have attended Generative AI workshop in PSG technology and hackathon in DR.NGP college of engineering

My strengths lie in being an effective communicator, a team player, and someone who is highly adaptable to new environments.

My short-term goal is to get placed in a good company where I can apply my technical knowledge, learn new skills, and adapt to the professional work environment.

My long-term goal is to become an expert in my field, take on more responsibilities, and grow into a leadership or specialist role where I can contribute to major projects and help the company grow.
